THIS IS UNEVALUATED INFORMATION

25X1

1. A hard surface road [#924] runs from Ruzomberok eastward to Lipt Sv Mikulas via Liskovo. The road is approximately two lanes wide and is designed for heavy usage in all weather. The top layer is surfaced with a light tar-bound macadam. The road is classed as a first class highway and runs through a valley parallel to the Vah River, which flows east and west.
2. A loose surface, all weather road [#909] which is approximately one lane in width runs from Lipt Tepla northward to Vys Kabin. It runs through hilly terrain and could bear heavy usage. The road foundation consists of natural rock, stone and dirt. The top layer is of gravel surfaced with sand and when it rains the road becomes potholed and deeply rutted.
3. A number of loose surfaced, dry weather, dirt roads [#935] run in the vicinity of Liskovo, Lucky, Stianvica and Ivachnova. The roads have a sand-clay foundation and after each rain these dirt roads become quagmires of mud. Farmers and villagers maintain the dirt roads.
4. A wood constructed bridge is located south of Liskovo. It is approximately one lane in width. It is not strong enough to bear heavy usage. This bridge crosses the Vah River.
